Reference File No. Y779-02

Dear Mr. Sergio:

Testing has been completed on the SGI 3927 screen type spark arrester submitted for qualification testing. Reference the correspondence of November 6, 2003.

The SGI 3927 screen type spark arrester was examined and tested in accordance with the USDA Forest Service Standard 5100-1c, "Spark Arresters For Internal Combustion Engines." The SGI 3927 is qualified for an engine application of 31.9 horsepower, or smaller four-cycle engine. A flow rating of 159 cubic feet per minute has been assigned to this unit. A summary of the test results is attached. This unit will be listed in the Spark Arrester Guide as follows:

Manufacturer & Model	Position	Rated Flow	Remarks
SGI 3927	Multiple	159 CFM	~

Qualification of the above-identified product indicates only that the unit of product submitted meets the USDA Forest Service Standard 5100-1c. It does not imply endorsement of the product by the Department of Agriculture. The stated identification is that of the unit of product that was submitted. The Department of Agriculture assumes no responsibility for infringement of patent or copyright, for misuse of manufacturer's name, or for other misrepresentation in connection with any use made of this qualification.

Sincerely,

JOHN D. FEHR
Manager
